

Creekside Highland Haven - Breeding Edition Supply Checklist

For Newborn Calves (Maternity Ward Must-Haves)

- KPX Colostrum - Keep it in your freezer at all times
- KPX Boost - For weak or slow-start calves
- KPX Electrolytes - Gentle and effective
- KPX Calf Pruf - For gut support and bounce-back
- A trusty tuber - We recommend the Trusty Tuber (our favorite brand)
- Clean bottles and nipples - Ready to go
- Towels & iodine - For drying off and dipping navels
- Thermometer - Always know, don't guess
- Bolus gun - For administering pills or supplements like scour boluses
- Scale and sling - For weighing newborn calves
- Latex and work gloves - In addition to OB sleeves
- Calving book or record-keeping notebook - Track dates, weights, and calf details

For Cows (Especially During Calving)

- OB gloves & lube
- Calving chains - Only if trained to use them
- Clean straw or bedding
- Banamine - For pain or inflammation after calving
- Propylene Glycol or Nutri-Drench - For post-calving energy
- Electrolytes or molasses water
- Fly spray or pour-on if calving during warmer months

For Bulls & Breeding Stock

- Loose minerals year-round (we use seasonal blends like VitaFerm HEAT)
- Pour-on or injectable dewormer
- Fly control - Rubs, sprays, predators, or misters
- Draxxin, Nuflor, Noromycin - For vet-directed infection support
- Banamine - Always have it on hand
- Thiamine and Vitamin B Complex - Especially for stress or illness

Creekside Highland Haven - Breeding Edition Supply Checklist
